

# Quick Start

## Baofeng UV-5R

Handheld VHF/UHF Amateur Radio Transceiver

This page should help you get started right away. If you need more information check your owner's manual or visit [uhuru.info](http://uhuru.info)

### 1) Attach Antenna

Screw the antenna into the radio. Slide in battery

### 2) Turn On Radio

Turn *Volume* knob to hear Voice Message

### 3) Select Channel Mode

Push *VFO/MR* button to select Channel mode which is announced by Voice Message

### 4) Select Display Line

Choose the lower Display Line by pushing the *A/B* button to move the indicator at the left side of the Display Line (little triangle)

### 5) Select Channel

You can use the channel that is already selected. If you need to change it (so it is the same as the other radio you are connecting with) then go to the top of the keyboard and use the *Up/Down* arrows to find the channel you want.

### 6) Push To Talk (PTT)

Push and hold the *PTT* button and talk into the front of the radio. Release the button when you are finished talking. Then listen for the response.
